Professional Summary

UC Davis graduate with a **B.S. in Statistics (Applied)** and a **minor in Managerial Economics**, combining **analytics, technology, and business problem-solving**. Experienced in gathering stakeholder requirements, analyzing financial and operational data, building **data pipelines, dashboards, and automated tools**, and communicating findings to technical and non-technical audiences.

Education

University of California, Davis — Davis, CA

B.S. in Statistics (Applied), Minor in Managerial Economics — *September 2022 – June 2026*

- **Relevant Coursework:** Econometrics, Regression & Statistical Modeling, Time Series & Forecasting, Operations Research, Financial Economics, Statistical Data Science

Technical & Business Skills

Programming & Data: Python, SQL, R, Pandas, PostgreSQL, SQLite, ETL/ELT, Data Modeling, Data Validation

Analytics & BI: Excel, Power BI, DAX, Power Query, Tableau, Statistical Modeling, Forecasting, Machine Learning, Financial & Operational Analysis

Development & Delivery: React, Streamlit, Supabase, Docker, Git/GitHub, Requirements Gathering, Stakeholder Communication, Process Improvement

AI & Automation: AI-native workflows, prompt engineering, AI-assisted research, coding, documentation, workflow automation, and output validation

Experience

Soaring Eagle Roadlines — July 2026 – October 2026

Operations & Financial Analyst Intern — *Fresno, CA*

- **Identified a manual fleet-tracking bottleneck and independently built a dispatch application** using Python, Streamlit, SQLite, and Pandas, **reducing manual daily fleet-tracking work** for a 20-truck fleet
- Translated dispatcher requirements into **ETA tracking, empty-date visibility, and backhaul-priority flags**, consolidating fragmented load information into a reusable, AI-assisted operational workflow
- **Supported operational and profitability decisions** by analyzing revenue, gross profit, fuel, and transportation expenses; reconciled records, investigated discrepancies, and communicated findings through Excel reports and cross-team follow-up

Aggie Sports Analytics — September 2025 – June 2026

Data Analyst — *Davis, CA*

- **Coordinated project tasks and stakeholder feedback within a six-member team** delivering an athlete-performance analytics platform for UC Davis Football, supporting technical implementation and iterative improvements
- Worked directly with coaching and strength staff to **translate analytical needs into dashboard and player-comparison requirements**, presenting platform capabilities and findings to non-technical stakeholders

Selected Projects

EstateFlow Housing Market Analytics Platform | **Repository** — September 2026 – October 2026

Python, Pandas, PostgreSQL, SQL, Docker, Power BI, DAX, Power Query

- **Built an end-to-end ETL pipeline** using Python, Pandas, PostgreSQL, and SQL to ingest, clean, reshape, and integrate Zillow home-value and rent data into **462,410 matched ZIP-month records across 8,424 ZIP codes**
- **Organized data processing into staging, intermediate, and analytical layers**, automating transformations and market-metrics marts with checks for completeness, positive values, duplicate keys, reconciliation, and metric accuracy; added PostgreSQL integration tests in CI
- **Connected validated pipeline outputs to a five-view Power BI report and public browser dashboard** for geographic comparisons, housing trends, growth, and data coverage

ProTech Athlete Performance Platform | **Repository** — October 2025 – May 2026

React, Supabase, PostgreSQL, SQL, Python, Chart.js

- **Helped build a full-stack athlete-performance dashboard for UC Davis Football**, turning ForcePlate and NordBoard testing exports into athlete profiles, historical trends, teammate comparisons, and AI-generated performance summaries for coaching and strength staff
- **Developed React and Chart.js performance visualizations and supported Supabase data and image workflows**, improving multi-year comparisons, missing-data handling, bulk uploads, and pose-aware athlete photo cropping
