

Yuvraj Singh Riyar

Data & Business Analytics | Applied Statistics | Financial & Operational Analysis

510-342-4349 | ysriyar30@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of California, Davis

Davis, CA

B.S. in Statistics (Applied Statistics), Minor in Managerial Economics

June 2026

Relevant Coursework: Regression & Statistical Modeling, Time Series & Forecasting, Statistical Data Science, Econometrics, Operations Research, Financial Economics

TECHNICAL SKILLS

Languages & Data: Python, SQL, R, PostgreSQL, SQLite, Microsoft Excel

Libraries & Frameworks: Pandas, scikit-learn, XGBoost, Streamlit, React, Supabase, Chart.js

Analytics: Regression, Data Visualization, Dashboard Development, Time Series Analysis, Forecasting, Machine Learning, Statistical Testing, Data Cleaning, Data Validation, Financial Analysis, Operational Analysis

Tools: Alteryx, Tableau, Git/GitHub, Jupyter Notebook, RStudio

EXPERIENCE

Soaring Eagle Inc.

June 2026 – Present

Operations & Financial Analyst

Fresno, CA

- **Cut daily fleet-tracking time by roughly 50%** and reduced missed follow-ups and late backhaul searches by building a dispatch application with *Python, Streamlit, SQLite, and Pandas* that centralized daily updates and surfaced ETAs, empty dates, and backhaul priorities across 20 trucks
- **Enabled faster load, truck, and route profitability reviews** by converting revenue, gross profit, fuel cost, and transportation expense data into decision-ready *Excel* visuals for budgeting and resource-allocation decisions
- **Improved freight-record accuracy and operational visibility** by reconciling transactions, coordinating broker follow-ups, and maintaining current load records through twice-daily reviews

Aggie Sports Analytics

September 2025 – June 2026

Data Analyst

Davis, CA

- Led a **six-member cross-functional team** and partnered with UC Davis Football stakeholders to gather requirements and deliver an athlete-performance platform for use by coaching and strength staff
- Managed project scope, priorities, and development workflows while contributing *React* visualizations, *Supabase* data uploads, and data-quality validation across multi-year athlete records
- Presented platform capabilities and analytical outputs to UC Davis Football stakeholders, translating technical results into clear player- and position-level insights for coaching and strength workflows

SELECTED PROJECTS

ProTech Athlete Performance Platform | [Repository](#)

October 2025 – May 2026

React, Supabase, PostgreSQL, SQL, Chart.js

- **Enabled UC Davis Football staff to evaluate athlete development** through interactive dashboards, spider charts, and year-over-year comparisons across weight, speed, jumping, strength, and force-production metrics
- **Replaced fragmented spreadsheet workflows with a centralized data system** by consolidating multi-year roster, strength, ForcePlate, and NordBord records in *Supabase and PostgreSQL*
- **Reduced manual preparation and improved data consistency** by developing pose-aware athlete image cropping, automated uploads, and data-validation workflows

King County Housing Market Analysis

May 2026

R, Multiple Linear Regression, Statistical Modeling

- Analyzed approximately **15,000 home sales** using multiple linear regression to quantify how structural, quality, and geographic characteristics influence property values
- Compared models using interaction effects, ANOVA/F-tests, standardized coefficients, and diagnostics; found structural characteristics explained **55.7% of sale-price variance**, with construction grade and living space among the strongest drivers

NBA Injury Risk Analysis | [Repository](#)

April 2025 – June 2025

R, tidyverse, caret, randomForest, XGBoost, pROC

- Analyzed **11,000+ NBA player-seasons** and engineered **26+ predictive features** to evaluate relationships between workload, player characteristics, and injury risk
- Built and evaluated logistic regression, random forest, and XGBoost models, achieving **88.3% accuracy** and **0.956 AUC** while interpreting key risk factors and model limitations
