PROFESSIONAL SUMMARY

UC Davis graduate with a **B.S. in Statistics (Applied)** and a **minor in Managerial Economics**, combining **analytics, technology, and business problem-solving**. Experienced in gathering stakeholder requirements, analysing financial and operational data, building **data pipelines, dashboards, and automated tools**, and communicating findings to technical and non-technical audiences. Hands-on experience with **Python, SQL, PostgreSQL, Excel, Power BI, data validation, workflow automation, and rapid prototyping**.

EDUCATION

University of California, Davis

Davis, CA

B.S. in Statistics (Applied), Minor in Managerial Economics

September 2022 – June 2026

- **Relevant Coursework:** Econometrics, Regression & Statistical Modeling, Time Series & Forecasting, Operations Research, Financial Economics, Statistical Data Science

TECHNICAL & BUSINESS SKILLS

Programming & Data: SQL, Python, R, PostgreSQL, SQLite, Pandas, Data Modeling, ETL/ELT, Data Transformation, Data Cleaning, Validation, Reconciliation

Business Intelligence & Reporting: Power BI, Tableau, Microsoft Excel, Streamlit, Chart.js, DAX, Power Query, Dashboard Development, KPI Reporting, Data Visualization

Analytics & Business: Financial & Operational Analysis, Statistical Analysis, Forecasting, Process Improvement, Requirements Gathering, Stakeholder Communication, Cross-Functional Collaboration, Project Coordination

Tools & Automation: Supabase, Docker, Git/GitHub, Jupyter, scikit-learn, React, Cursor, AI-Assisted Development, Workflow Automation, Rapid Prototyping

EXPERIENCE

Soaring Roadlines Inc.

June 2026 – Present

Operations & Financial Analyst

Fresno, CA

- **Identified a manual fleet-tracking bottleneck and independently built a dispatch application** using Python, Streamlit, SQLite, and Pandas, **reducing daily tracking time by roughly 50%** across a 20-truck fleet
- Translated dispatcher requirements into **ETA tracking, empty-date visibility, and backhaul-priority flags**, consolidating fragmented load information into a reusable, AI-assisted operational workflow
- **Supported operational and profitability decisions** by analysing revenue, gross profit, fuel, and transportation expenses; reconciled records, investigated discrepancies, and communicated findings through Excel reports and cross-team follow-up

Aggie Sports Analytics

September 2025 – June 2026

Data Analyst

Davis, CA

- **Led a six-member cross-functional project team** delivering a centralised athlete-performance analytics platform for UC Davis Football, coordinating stakeholder requirements, technical implementation, and feedback
- Worked directly with coaching and strength staff to **translate analytical needs into dashboards, player comparisons, and decision-relevant insights**, adapting technical communication for non-technical stakeholders
- **Integrated and validated multi-source performance data** from roster, strength, ForcePlate, and NordBord files using Supabase, PostgreSQL, SQL, Python, and bulk-upload workflows

SELECTED PROJECTS

EstateFlow Housing Market Analytics Platform | [Repository](#)

September 2026 – October 2026

Python, Pandas, PostgreSQL, SQL, Docker, Power BI, DAX, Power Query

- **Built and shipped an end-to-end housing-market analytics platform** processing **462,000+ ZIP-month records across 8,400+ ZIP codes**, transforming Zillow home-value and rent data through Python, PostgreSQL, and SQL into analysis-ready models
- **Automated ingestion, transformation, analytical marts, and fail-fast data-quality controls** for completeness, positive values, duplicate keys, reconciliation, and metric accuracy; configured PostgreSQL integration tests in CI
- **Developed a five-page Power BI report and browser-based dashboard** providing national, state, metro, and ZIP-level views of home values, rents, gross rent-to-value percentages, year-over-year growth, historical trends, and data coverage

ProTech Athlete Performance Platform | [Repository](#)

October 2025 – May 2026

React, Supabase, PostgreSQL, SQL, Python, Chart.js

- **Helped translate coaching requirements into a full-stack analytics product** combining interactive dashboards, year-over-year athlete comparisons, multi-source performance data, and AI-generated player overviews
- **Replaced fragmented spreadsheet workflows with a centralised data platform** supported by PostgreSQL/Supabase data models, automated uploads, validation logic, and reusable analytical components
