Professional Summary

UC Davis graduate with a **B.S. in Statistics (Applied)** and a **minor in Managerial Economics**, combining analytics, technology, and business problem-solving. Experience translating stakeholder needs into **data pipelines, dashboards, and automated tools**, alongside financial and operational analysis. Brings practical implementation, output validation, and clear communication with technical and non-technical audiences.

Education

University of California, Davis — Davis, CA

B.S. in Statistics (Applied), Minor in Managerial Economics — *June 2026*

- **Relevant Coursework:** Econometrics, Regression & Statistical Modeling, Time Series & Forecasting, Operations Research, Financial Economics, Statistical Data Science

Technical & Business Skills

Business & Delivery: Business Analysis, Requirements Gathering, Process Improvement, Stakeholder Communication, Project Coordination

Analytics & Reporting: Excel, Power BI, DAX, Power Query, Tableau, Alteryx, KPI Reporting, Financial & Operational Analysis, Forecasting

Programming & Data: Python, SQL, R, Pandas, PostgreSQL, SQLite, ETL/ELT, Data Modeling, Data Transformation, Validation, Reconciliation

Platforms & Development: React, Streamlit, Supabase, Docker, Git/GitHub, Jupyter, CI Integration Tests

AI & Automation: AI-native workflows, prompt engineering, AI-assisted research, coding, documentation, workflow automation, and output validation using Claude, ChatGPT, Codex, and Cursor

Experience

Soaring Eagle Roadlines — July 2026 – October 2026

Operations & Financial Analyst (Intern) — *Fresno, CA*

- **Built an AI-assisted dispatch application** using Python, Streamlit, SQLite, and Pandas to track a **20-truck fleet**; reduced routine tracking time in individual use by an **estimated 50%**
- **Translated operational needs into ETA tracking, empty-date visibility, and backhaul-priority flags**; verified application outputs against manually calculated dates and priorities
- **Supported profitability and operational reviews** by analysing revenue, gross profit, fuel, and transportation expenses in Excel; reconciled records, investigated discrepancies, and coordinated follow-ups

Aggie Sports Analytics — September 2025 – June 2026

Data Analyst — *Davis, CA*

- **Coordinated assigned tasks and feedback within a six-member ProTech team** delivering an athlete-performance platform for UC Davis Football
- **Worked with coaching staff to resolve inconsistent data uploads**, explaining formatting requirements in plain language so a coach could update records independently
- **Improved interface usability, chart presentation, and data consistency**; prepared athlete images, checked profiles with missing data, and presented the platform at the ASA case competition

Selected Projects

EstateFlow Housing Market Analytics | **Repository** — September 2026 – October 2026

Python, Pandas, PostgreSQL, SQL, Docker, Power BI, DAX, Power Query

- **Built and published an end-to-end housing analytics platform** transforming Zillow home-value and rent data into **462,000+ matched ZIP-month records across 8,400+ ZIP codes** through layered PostgreSQL models
- **Automated ingestion, transformation, and data-quality controls** for completeness, duplicate keys, reconciliation, and metric accuracy; configured PostgreSQL integration tests in CI
- **Delivered a five-page Power BI report and public web dashboard** for market comparisons, trends, and a separate forecast experiment; added definitions and reading guidance following non-technical user feedback

ProTech Athlete Performance Platform | **Repository** — October 2025 – May 2026

React, Supabase, PostgreSQL, SQL, Chart.js

- **Helped replace fragmented spreadsheet workflows with a centralised platform** combining athlete profiles, interactive charts, year-over-year comparisons, and multi-source performance records
- **Refined React interfaces and visualisations** and contributed Supabase storage/data-consistency work, checking outputs against known athlete records and incorporating coaching feedback
